ARTICLE 44
TRACK & FIELD

4410. MAXIMUM MEETS INDIVIDUAL

No student may participate in more than ~~11~~ **12** scheduled track meets (including indoor and outdoor) during a track season exclusive of league championships and state meets.

Rationale: With the length of the track and field season and the number of mid-week and weekend opportunities to compete in competitions, the extension of the maximum contest by one meet would benefit all participants and coaches. With the number of contests that do not allow for qualifiers based on wind readings in certain events, granting another meet opportunity is good for the participants and Coaches of the sport.

Pros: Allows student athletes and coaches another opportunity to schedule a meet and produce times/distances/heights that would qualify for the state meet.

With the spring weather to contend with and weather-related issues with meets, offering another opportunity with no increase in the length of season benefits all participants and coaches.

Cons: Additional meet fee for the school to incur.
